Contents, Volume 26

Number 1 **February 1992**

In Memoriam
ANNA NAGURNEY—In Memoriam: Stella Dafermos, 1940–1990 1

ANNA NAGURNEY—Introduction to the Special Issue 3

TORBJÖRN LARSSON AND MICHAEL PATRIKSSON—Simplicial Decomposition with Disaggregated Representation for the Traffic Assignment Problem 4

TERRY FRIESZ, HSUN-JUNG CHO, NIHAL J. MEHTA, ROGER L. TOBIN AND G. ANANDALINGAM—A Simulated Annealing Approach to the Network Design Problem with Variational Inequality Constraints 18

MARGUERITE FRANK—Obtaining Network Cost(s) from One Link's Output 27

PATRICE MARCOTTE, GÉRALD MARQUIS AND LOURDES ZUBIETA—A Newton-SOR Method for Spatial Price Equilibrium 36

FARUK GÜDER, JAMES G. MORRIS AND SEOK H. YOON—Parallel and Serial Successive Overrelaxation for Multicommodity Spatial Price Equilibrium Problems 48

ANNA NAGURNEY AND ALEXANDER EYDELAND—A Parallel Network Equilibration Algorithm for a Class of Constrained Matrix Problems 59

Number 2 **May 1992**

YIANNIS A. KOSKOSIDIS, WARREN B. POWELL AND MARIUS M. SOLOMON—An Optimization-Based Heuristic for Vehicle Routing and Scheduling with Soft Time Window Constraints 69

M. GAUDIOSO AND G. PALETTA—A Heuristic for the Periodic Vehicle Routing Problem 86

ENRIQUE FERNANDEZ AND PATRICE MARCOTTE—Operators-Users Equilibrium Model in a Partially Regulated Transit System 93

JAMES H. BOOKBINDER AND ALAIN DÉSILETS—Transfer Optimization in a Transit Network 106

OMAR DRISSI-KAÏTOUNI AND ABDELHAMID HAMEDA-BENCHEKROUN—A Dynamic Traffic Assignment Model and a Solution Algorithm 119

JACK BRIMBERG AND ROBERT F. LOVE—A New Distance Function for Modeling Travel Distances in a Transportation Network 129

P. M. DEARING, P. L. HAMMER AND B. SIMEONE—Boolean and Graph Theoretic Formulations of the Simple Plant Location Problem 138

ERHAN ERKUT AND BARBAROS C. TANSEL—On Parametric Medians of Trees 149

Bibliographic Section 157

Number 3 **August 1992**

GILBERT LAPORTE, FRANÇOIS LOUVEAUX AND HÉLÈNE MERCURE—The Vehicle Routing Problem with Stochastic Travel Times 161

PIERRE TRUDEAU AND MOSHE DROR—Stochastic Inventory Routing: Route Design with Stockouts and Route Failures 171

CHRYSSI MALANDRAKI AND MARK S. DASKIN—Time Dependent Vehicle Routing Problems: Formulations, Properties and Heuristic Algorithms 185

OBED BERMAN, RICHARD C. LARSON AND NIKOLETTA FOUSKA—Optimal Location of Discretionary Service Facilities 201

TURGUT AYKIN AND GARY F. BROWN—Interacting New Facilities and Location-Allocation Problems 212

DENOS C. GAZIS AND ROBERT HERMAN—The Moving and "Phantom" Bottlenecks 223

WARREN B. POWELL AND IOANNIS A. KOSKOSIDIS—Shipment Routing Algorithms with Tree Constraints 230

KJELL JANSSON AND BOSSE RIDDERSTOLPE—A Method for the Route-Choice Problem in Public Transport Systems 246

Special Section
Abstracts for the 1990–1991 Transportation Science Section Dissertation Prize Competition 252

Number 4 **November 1992**

In This Issue 261

MARK H. KEATON—Designing Railroad Operating Plans: A Dual Adjustment Method for Implementing Lagrangian Relaxation 263

TEODOR GABRIEL CRAINIC AND JACQUES ROY—Design of Regular Intercity Driver Routes for the LTL Motor Carrier Industry 280

HUGO P. SIMÃO AND WARREN B. POWELL—Numerical Methods for Simulating Transient, Stochastic Queueing Networks—I: Methodology 296

HUGO P. SIMÃO AND WARREN B. POWELL—Numerical Methods for Simulating Transient, Stochastic Queueing Networks—II: Experimental Design 312

HANIF D. SHERALI AND SEONG-IN KIM—Variational Problems for Determining Optimal Paths of a Moving Facility 330

LARRY R. ANDERSON AND ROBERT A. FONTENOT—Optimal Positioning of Service Units Along a Coordinate Line 346

Technical Note
ARIE TAMIR—On the Complexity of Some Classes of Location Problems 352
